---

**Profile**

I am a Computer Engineering student with a strong vision to contribute to the future by developing technology that is beneficial to society. My primary interest lies in web development, encompassing both frontend and backend development.

---

**Skills**

- **Tech** : Node JS, Golang , Laravel, PHP, Vue JS
- **Technical Skills** : Web Development, API Integration
- **Tools** : Visual Studio Code, Postman, GitHub, XAMPP, Mongo DB, Supabase

---

**Work Experience**

**Junior Front End Developer**

**BPKAD Jawa Barat | September 2025 – December 2025**

- Developed a landing page website using Vue.js.
- Integrated backend data fetching via API.
- Conducted quality assurance testing to ensure functionality and performance.

**Fullstack Developer (Freelance)**

**Independent Projects | January 2025 – February 2025**

- Developed a warehouse management website using Laravel and SQL.
- Implemented user authentication features, including login, registration, and user dashboard.
- Built product CRUD functionality and user activity log tracking.
- Managed transaction processing and implemented moving average calculations for inventory stock.
- Deployed and hosted the application on DomCloud.

**Frontend Developer (Freelance)**

**Myedisi | January 2024 – February 2024**

- Developed library, magazine, and yearbook pages using HTML and CSS.
- Implemented designs based on the provided mockups.

---

**Education and Certification**

- **Bachelor of Informatics Engineering**, Universitas Logistik dan Bisnis International – GPA 3.73

---

**Project Highlights**

**Shopify Bliss**

**Backend Developer**

- Developed a web builder system for creating websites.
- Built the application using Node.js and React.js.
- Implemented Google API integration for user authentication.

## Registrasi Online Submission Service (OSS)

### Manual QA Testing (Website APP)

- Conducted manual testing for login, submission creation and updates, verification workflows, and SP2D issuance features.
- Validated role-based processes (Operator and Verifikator) and ensured data accuracy across submission statuses.
- Documented test scenarios, results, and identified issues to ensure system functionality and reliability.

## **Portofolio**
